Construction of the new steelworks near Krakow is under the control of Soviet engineers. A large foundry with an 80 m. high chimney is being built. Furnaces and a rolling mill will be installed when this building is complete. In addition, coke ovens are being built as well as a Cowper stove about 70 m. in height. A workers' settlement is to be built near the steelworks. A pipeline connects the foundry with the main pipe network which conveys natural gas from the oilfields.
